

ABOUT WONDERFUL STRUCTURES

INTRODUCTION

Wonderful Structures is based on the principle that everything is born from the simplicity and beauty that governs the universe.

We are a combination of Architecture and Engineering, and we seek to produce structures that benefit humanity in some way.

We believe that tomorrow can be better than today, that's why we keep innovating.

Our passion is the beauty, the simplicity, and the Engineering.

OUR MISSION

It surprises us every new day, with its mysterious and infinite beauty.

We propose to take advantage of our talent to create technological solutions that are harmonious with the nature that surrounds us and generate investment opportunities from the manufacture of unique products using cutting-edge materials in the field of Construction, Architecture and Engineering.

OUR VISSION

We are lovers of innovation.

We aim to be recognized as a company that manufactures products that are one step beyond excellence.

We will be leaders in ecological construction, sustainable Architecture, and spatial solutions with Engineering of fiber-reinforced composites and aerospace materials.

We seek to leave a legacy that benefits humanity.

OUR VALUES

We are respectful of the environment, that is why we manufacture products that harmonize with nature.

We use cutting-edge materials that include organic fibers and polymer compounds.

Our structures are ultra-resistant, ultra-lightweight and easy to transport to any destination.

We do not seek to compete by slowing down others... We believe in harmonious growth, generosity and abundance for all, which the Universe provides.

We are persistent in wanting to improve our products with the passage of time and experience.

We focus on wanting to ensure that our clients are fully satisfied.

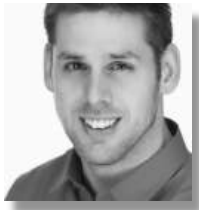

OUR TEAM

Kurt Blake
Owner - Manufacturer

Gustavo Santander
Architect - Advisor

Daryl Urbanski
Sales Director

Juan S. Mantilla
Structural Engineer

Juan Carlos Lora
Architect Certifier

Betty Moreno
Marketing Strategist

Jodie Slack
Sales Executive

Andrian Anguiano
Architect - Sustainability

Shirley Gonzalez
Web Developer

Martin Lora
Graphic Designer

OUR HISTORY

In 2010, Architect Gustavo Santander, acting as CEO, formed the company ColFibrex with 2 more partners. This company received an order for many Portable Wastewater Treatment Plants for the Colombian Army and those were successfully manufactured.

Gustavo later proposed the design and manufacture of a survival module that he himself baptized as **The Xphere** – see image – but its marketing was complicated and that was when the idea arose of creating a construction system based on polymers that could be covered with soil and vegetation, which could have a larger market.

The system was named “Green-House System” and was marketed through the web domain ColFibrex.com. This technology was Patented by the partners to protect their Invention rights.

ColFibrex worked successfully for 2 years, and several projects were built in some countries, but the high prices of raw materials in Colombia made the project economically unviable and the company closed operations in 2012.

A year later (2013) Gustavo met Kurt Blake in Mexico, an expert manufacturer of Fiber Reinforced Composites products and owner of the company Blake Corporation SA. and seeing the opportunity, he returned to his experience and perfected the technology with new engineering, new designs and new molds and together they formed the company Green Magic Homes (GMH).

GMH began to grow and have great success in many countries around the world.

EASY FAST BUILDING

Gustavo developed the patent named Easy Fast Building and with it, GMH won a Grant under the auspices of the US National Science Foundation for the development of a Shelter for the Homeless, which was successfully manufactured... See image.

Later, GMH obtained another Grant under the auspices of the US Airforce for the development of a Fighter Aircraft Hangar.

Green Magic Homes gained global recognition and built projects in 20 countries around the world.

Due to the 2020 pandemic that lasted until early 2023, Green Magic Homes, which had been growing with great success and had a robust team of professionals, began to experience economic difficulties and had to close operations in April 2023.

Kurt Blake, as the technology manufacturer in Mexico and with its own resources, decided to continue manufacturing ecological homes and new technological solutions, through the now known **Wonderful Structures** by Blake Corporation SA de CV.

Today, Wonderful Structures has enormous accumulated experience and aims to revolutionize the green construction industry in the world.

OUR SERVICES AND BENEFITS

We focus on the development of spatial solutions that offer a different experience, through curved spaces, with rounded corners, spacious, neat and illuminated, manufactured with the latest generation polymers.

Our technologies are adaptable to any climate in the world, through thermally insulated walls, with variable insulation materials, adaptable to the requirements of each project.

Our products generate energy savings, are modular, ultra-light, ultra-resistant, easy and quick to assemble, 100% waterproof, made with long-lasting materials, washable walls, easy to transport, easy to repair in case of damage, they do not corrode or rust and are environmentally friendly.

WHAT DIFFERENCE US FROM OTHERS

We believe in a new lifestyle in harmony with nature, that is why we manufacture biophilic homes that breathe, energize and create an immersive experience for those who live in them.

We focus on simple and powerful Architectural and Engineering solutions that invite us to return to our roots, to return to ourselves, lower stress, live in harmony with our planet and heal our souls with the power of nature.

We use cutting-edge materials, such as fiber-reinforced composites, and we incorporate ecological fibers coming from the Agave embedded with resins, to create Aero-space materials ultra-resistant and lightweight.

Our proposals are disruptive, and we venture into new developments, always trying to go one step ahead of what was projected.

OUR SOCIAL PROOF

Wonderful Structures is the new technology development area of the Mexican company Blake Corporation S.A., based in Cancun.

Founders of the polymers & FRP NGO in Mexico, with more than 30 years in the market, and more than 2000 different products manufactured for Top Companies worldwide, with a production plant with cutting-edge technology.

The company, founded in 1992, began manufacturing surfboards, then ventured into products for the Hospitality Industry, and later was involved in projects for the US Air Force and the US

National Science Foundation and now aims to revolutionize the Green Construction industry, with modular spaces manufactured with cutting-edge aerospace materials.

Our Technologies have been built in 20 countries around the world, including; the USA, Hawaii, Australia, Dubai, Qatar, Norway, Holland, Philippines, Spain, France, Italy, Czech Republic, India, Mexico, Puerto Rico, Costa Rica, Panama, Colombia, Ecuador and Argentina.

The technologies we have manufactured have been broadcast on Discovery Channel and DIY Network and have been disseminated by more than 100 media worldwide.

OUR BRAND

The name Wonderful Structures was strategically selected to reflect the innovative spirit that motivates us every day.

We do not settle for the good, we always want to achieve the best, we want to achieve excellence.

The golden color of our logo is a symbol of abundance and beauty. It is the color of gold, of the sun, of the sand of the sea, of the glow at sunset.

We want to be a reflection of how wonderful life is and we try to capture in each design, in each space we create, in each detail, something of the magic that the nature that surrounds us offers us.

Wonderful Structures is a brand in continuous evolution, in continuous movement and we believe that the perfection and beauty we have achieved today can be better tomorrow.
