CAPSULA

Advantages

- The system integrates with nature for a low visual impact on the surrounding ecosystem.
- Construction times are very fast with modules made of long-lasting polymers that increase the product's life cycle.
- The modular system reduces construction time by 50%-60%.
- It can be placed on a slab or cantilevered.
- Units can be optimized for maximum performance in all climate zones.
- The unit cover and windows are shipped to the job site packaged together with the structure.
- A variety of exterior colors offers designers broad creative flexibility.

CAPSULA

Our new generation of Eco-Hotels solutions, blends sustainability and advanced technology into high-quality design, fast building units with a major “wow” factor that empower the rapid creation of compelling eco-hospitality experiences.

- Wellness hospitality is growing at 20% rate per year.
- Expanding 50% Faster Than Regular Tourism.
- \$93.4 billion per year is directly spent on destination resorts, spas, and retreats.
- Wellness tourists spend about 130% more than regular ones.
- Rooms provide up to 20% lift per unit versus standard ones (Global Wellness Institute).

Wellness

CAPSULA

By 2022 wellness tourism will be a 919 billion industry by 2022 and will represent 18 % of all tourism globally (Global Wellness Institute).

- In 2019 hotels with significant wellness operations generated 43% more in total revenues per available room (TRevPAR) in comparison to hotels with no wellness (HotStats).
- Hotels with extensive wellness operations benefited from a 20% higher ADR and generated 48% more in average revenues per room compared to hotels with minor wellness operations (HotStats).

CAPSULA

Nature

Usages

- Eco-hospitality
- Wilderness tourism
- Nomadic tourism
- Pop-up hotels
- Coworking camps

Wonderful Structures unique designs and its many features create a hospitality experience that integrates guests with the surroundings, fostering environmental awareness and appreciation of nature while offering significant advantages that deliver high-quality, authentic, memorable, and meaningful stays.

CAPSULA

Experience tourism is going through a stage of unprecedented explosive growth.

Eco-hospitality is becoming a standard in the new post-life global tourism market, as more travelers integrate their healthy preferences and values into their travel choices. With **W.S. Technology**, investors, owners and/or hosts can design their own resort with a distinctive eco-friendly style that blends seamlessly into the environment.

Experiences

CAPSULA

This model provides wide views on both sides allowing for a number of innovative internal configurations. The structure is lightweight which makes it ideal for cantilevering.
