Wonderful Structures

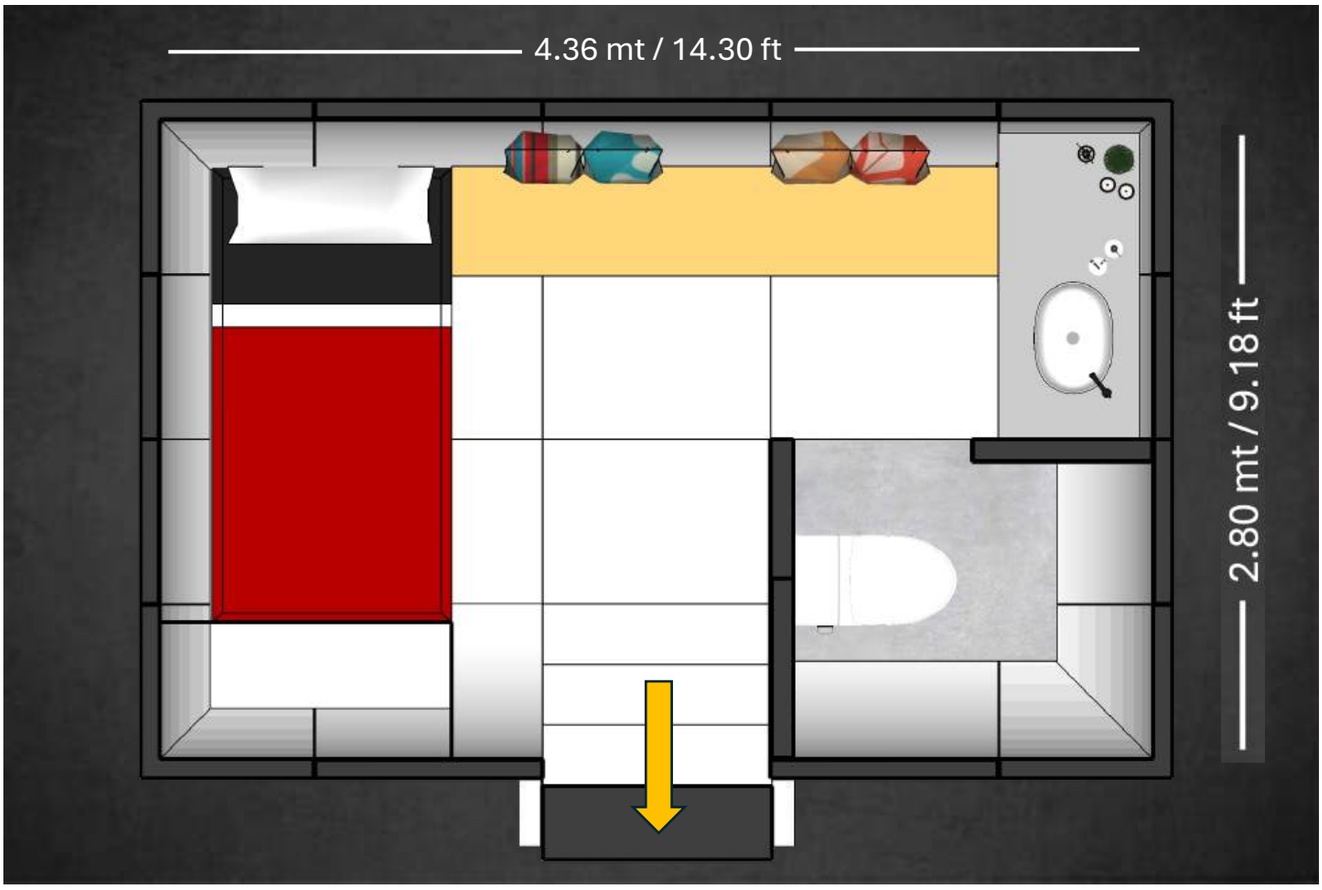
ARK BUNKERS

PATENT PENDING

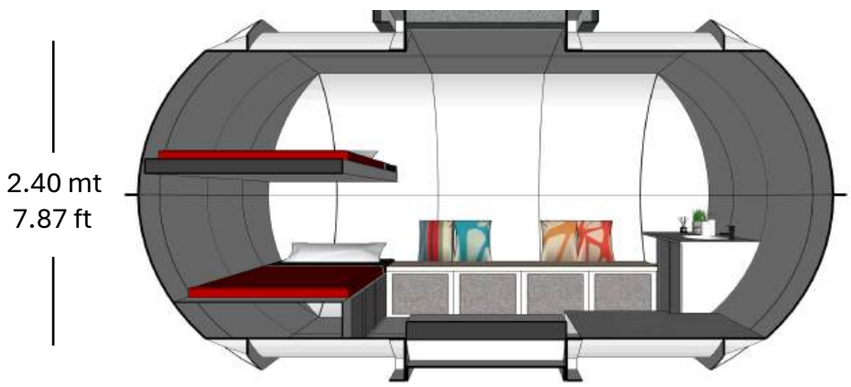
Fortress Bunker Compact

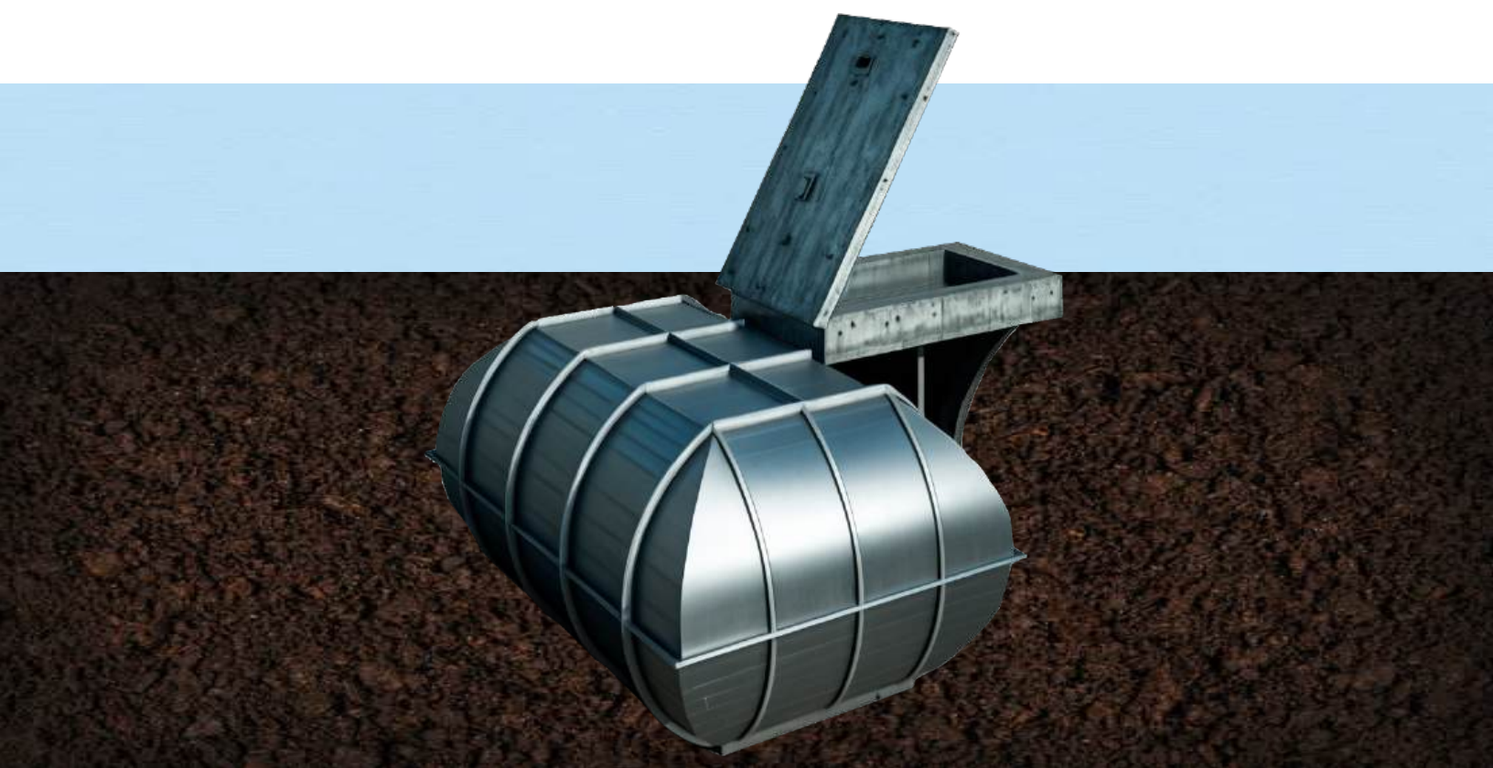
131.31 Sqft - 12.20 mt2

This security module offers a comfortable space, ideal for four people. It can be equipped with bunk beds, a desk or work-table, bench seating, kitchenette, and bathroom. Access is provided via wide stairs and a secure steel door, which can be camouflaged if desired.

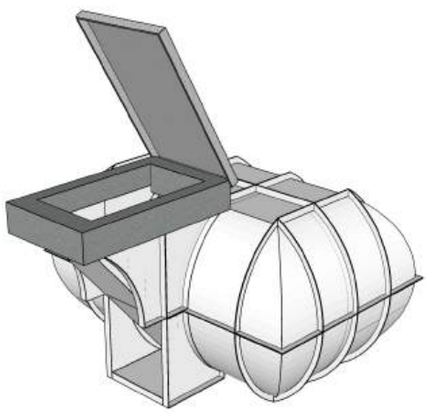


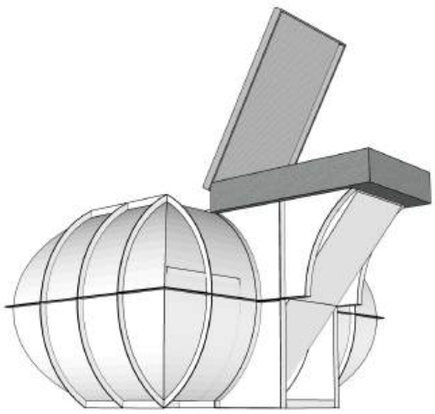
This module is delivered packed in three palletized boxes, ready to be shipped anywhere in the world. It can be assembled in just one day by a team of three people. The interior offers a spacious layout with an optimized design and a warm, inviting atmosphere that promotes peace and reflection, ideal for family gatherings in a secure space, hidden from the outside world.



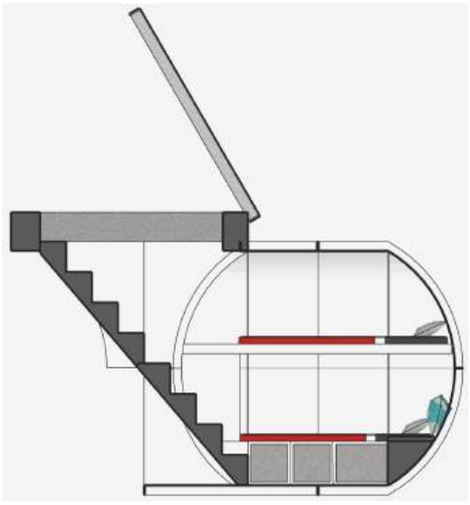


The structure is built using next-generation fiber-reinforced polymers; advanced aerospace-grade materials that combine multidirectional fibers with high-performance resins. Once assembled, the module behaves as a monolithic unit capable of withstanding extreme forces.





Its elastic behavior provides significant advantages in the event of seismic activity. The structure's domotic geometry and the architecture of its components form a highly stable and resilient structural capsule. It functions as a series of interconnected rings working in compression, reinforced by internal "veins" secured with galvanized steel bolts.



Note: Our bunkers are delivered without interior furnishings. **Wonderful Structures** provides the structural system for client assembly, including a complete set of floor plans, an Assembly Guide, and contact information for complementary technology providers. These complementary products may vary depending on the specific requirements and preferences of each client.
