WONDERFUL STRUCTURES

COST VARIABLES

Planning considerations for Eco-Green structures
Updated September 2026

ECO-GREEN SHELL

The current pricing catalog displays design examples and pricing for each Eco-Green shell system of framing.

OTHER CONSTRUCTION STAGES

Cement slab, electrical, water, waterproofing, doors, windows, HVAC, partitions, finishes, soil and gardens, among other project-specific work.

CUSTOM DESIGN $2,500

Our in-house architectural team is available for custom design modifications. Confirm scope and deliverables before ordering.

SHIPPING

Shipping depends on destination, load configuration and provider. Customers may select an appropriate shipping provider.

GEOTECHNICAL ENGINEER

Local soil conditions and permitting requirements may require evaluation by a qualified geotechnical engineer.

ENGINEERING STAMP

Some jurisdictions require drawings or calculations stamped by a locally licensed engineer for permitting.

CERTIFIED BUILDER TRAINING $5,000

Three-day training for professional builders who are new to the Eco-Green construction system.

PLANNING NOTE

Amounts and requirements can vary by project and jurisdiction. Confirm the current scope, availability and commercial terms with Wonderful Structures before relying on this document for a purchase, permit or contract.
