

Here we present a selection of highly reputable and experienced suppliers of NBC filtration systems, advanced ventilation and air purification systems, CBRN filtration masks, and positive pressure CBRN filtration units. These components are essential for ensuring breathable, contaminant-free air and sustaining life in our underground bunkers and bunker homes during nuclear, biological, or chemical threat scenarios.

NBC FILTRATION SYSTEMS

Link: [ANDAIR](#)

Ventilation systems are available for shelters of all sizes, supporting from 7 to 2,000 occupants, with the option to install multiple units for larger capacities—some Swiss shelters accommodate over 20,000 people. Andair AG systems operate both electrically and manually, and are rigorously tested for durability, chemical resistance, and filtration efficiency. A well-designed NBC shelter must also sustain sealed operation for at least 6 hours after a nuclear event to protect against initial external threats like smoke and radiation, during which internal CO₂ buildup becomes the main risk. Each person produces 0.67 cubic feet of CO₂ per hour and needs 88 cubic feet of free air for safe breathing during this critical period.

DISTRIBUTORS OF VENTILATION AND FILTRATION SYSTEMS IN THE USA

ANDAIR USA is the United States distributor for Andair AG located in Andelfingen Switzerland. Our company provides ventilation systems, blast valves, air filtration systems, and chemical biological protection for homes, corporate, military, oil refineries and government facilities.

ANDAIR AG is recognized worldwide as the premier supplier of shelter technology. Andair produces their products in their own factory in Andelfingen, Switzerland, following the rigid specifications established by the Swiss Federal Office of Civil Defense and, the Swiss Defense Technology and Procurement Agency.

CBRN FILTRATION MASKS

Link: [GAS MASKS](#)

At MIRA Safety, we take great pride in crafting gas masks for civilians and professionals alike. Whether you’re looking to outfit your agency, or your family, we have a wide variety of products to choose from. Our full-face gas masks offer professional-grade protection from a whole host of chemical, biological, radiological and nuclear (CBRN) threats.
