FIRST AID & EMERGENCY BACKUP

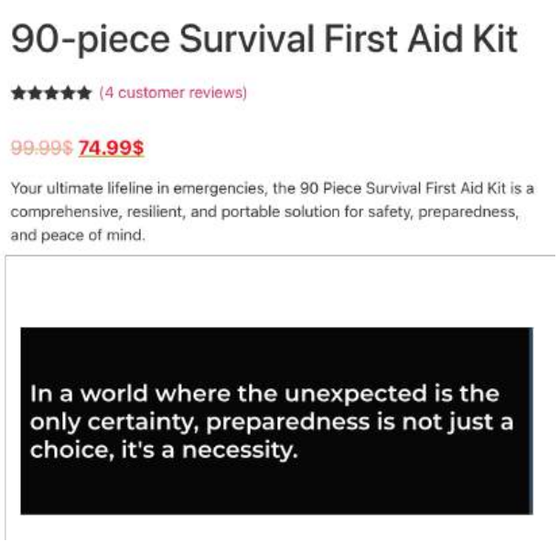
Below is a technical overview of leading U.S. based suppliers of **first aid and emergency backup kits**, ideal for inclusion in bunkers to maintain medical readiness during isolation:

90-piece Survival First Aid Kit

Link: BUNKER TACTICAL

This isn't just a first aid kit, it's a lifeline. It's the difference between panic and peace of mind, between chaos and control. Whether you're navigating the wilderness, embarking on a road trip, or simply living your everyday life, this kit is designed to be there when you need it most.

Each of the 90 pieces in this kit has been carefully selected to address a wide range of emergencies. From a simple cut to a severe burn, a sprained ankle to a life-threatening wound, this kit has you covered. It includes everything from examination gloves and adhesive tape to a CPR mask and a military-grade tourniquet.



Elite First Aid STOMP Medical Kit

Link: FIRST AID KIT

The Elite First Aid STOMP medical pack has been one of Elite First Aid's most popular kits for years. The STOMP is a fully stocked mobile military and trauma first aid pack. Kits are packed when you order to ensure freshly dated quality medical items. There are over 300 items in the STOMP and used by professionals including medics and military personnel. There is also room to add more of your own items if you feel necessary. We always recommend more tactical tourniquets such as C-A-T or Soft T in any large kit if you are going to be in combat, storm or areas where mass patients are expected.

TacMed™ Life Raft FAK

Link: LIFE RAFT FAK

The **TacMed™ Life Raft FAK** is designed to provide trauma support for any water-based rescue and survival mission. It meets the requirements of Combat Craft Division (CCD) to offer a fully equipped medical kit capable of treating life-threatening injuries and hazards found in a maritime environment (as directed under DODI 1322.24).

STOMP 2.5 BAG FROM REFUGE MEDICAL

Link: STOMP 2.5 Bag

The STOMP 2.5 Bag from REFUGE MEDICAL is designed to equip medical professionals operating in austere environments with the trauma medicine capabilities to support a squad-sized group. The STOMP bag contains equipment to treat multiple arterial bleeds, puncture wounds, broken bones, lacerations, instrumentation to aid in patient assessment, fluid administration, and more.
