SECURITY DOORS AND WINDOWS

Here we present a selection of highly reputable manufacturers specializing in bunker hatches and security windows. These companies offer fully customized designs tailored to meet specific architectural requirements and varying levels of protection, including blast resistance, ballistic shielding, and airtight sealing, ensuring optimal safety and performance for fortified structures.

EMERGENCY ESCAPE HATCHES

Link: **HATCHES**

Vault Pro has expertly designed and engineered a diverse range of heavy-duty escape hatches tailored for use in tornado storm shelters, secure safe rooms, and fully underground bunkers. These hatches offer enhanced durability, structural integrity, and ease of access during emergency situations, making them a reliable solution for a wide variety of high-security and survival applications.

All Vault Pro Hatches are built to exceed the FEMA 320, 361 and ICC-500 recommended standards and are simple to install and easy enough to use that a five year old can operate them in the case of an emergency.

Emergency Pro Escape Hatches are manufactured 100% in America and can be custom sized to fit any existing opening, poured in concrete and built to match any wall thickness.

BULLET RESISTANT WINDOW SYSTEMS

Link: **WINDOWS**

Panel Built's ballistic-rated windows are engineered to provide critical protection in underground bunker environments, where security and structural resilience are paramount. Designed to withstand ballistic impact and forced-entry attempts, these high-performance windows are available in multiple configurations and protection levels, including UL 752 and NIJ standards.

CUSTOMIZED WINDOWS

Link: **SECURITY WINDOWS**

Shield Security Doors' bullet-resistant windows are engineered to provide advanced protection for underground bunkers while maintaining compatibility with structural and design requirements. Available in single-hung, casement, awning, or fixed configurations, these custom-fabricated windows are built to withstand ballistic threats and forced entry, ensuring both functional security and seamless integration into fortified bunker systems.

Customized Design

Shield Security Doors presents advanced bulletproof windows that seamlessly integrate with the architectural aesthetics of both modern homes and historic buildings. Our residential security windows offer a perfect blend of protection, efficiency, and design, ensuring you never have to choose between security and beauty.

We build bulletproof windows and burglar-proof windows that are designed to complement our custom high-security FE/BR (forced entry-resistant and bulletproof) and ensure that there is no weak point in your security.

You don't compromise on style; we never compromise on security.
